**Subject:** Re: Update on Fish cage response work on Animas River

Lisa -

We pulled the fish from the Animas yesterday. We preserved them for necropsy and toxicity (tissue analysis). I am checking to see if we can get some of them to the EPA so that you can test them independently. We will certainly make any and all results available to the group and to the community.

I am hoping one of you can provide me an update on the status of the Animas fish cages for the Gold King Mine response. I would appreciate an update on any work or activity for yesterday and what is planned for the next two days. Ideally, I would like this information by 1 pm.
